

An aerial photograph of the Sandhills in Nebraska during the golden hour of sunset. The landscape is characterized by rolling, grass-covered hills. In the middle ground, a herd of dark-colored cattle is grazing on a slope. A small stream or irrigation canal winds through the valley between the hills. The sun is low on the horizon to the left, casting a warm, orange glow over the scene and creating long, soft shadows. The sky is a pale, clear blue.

**There are 22 million acres of
rangeland and pastureland
in Nebraska, half of which
are in the Sandhills.**
